Magnetic Tools Add Ease and Efficiency to Sign Making

Castle Rock, Colo., April 22, 2019 – [Master Magnetics, Inc.](#) (The Magnet Source®) – a leading manufacturer of fastening, magnetic graphics and sign holding solutions – has focused the simplicity and efficiency of magnets in the design of various essential tools aimed at adding speed and convenience to the sign making industry. Sign makers can find these magnetic tools on special promotion from Master Magnetics at the ISA Expo booth #3646.

Through May 24, 2019, ISA attendees can take advantage of Buy One Get One Half Off all orders of the [Vehicle Wrap Magnets](#) and the [Heat Gun Holder](#). For more information, visit Master Magnetics on the show floor.

Channel Letter Trim Cap Magnets

Firmly anchor channel letter trim caps during assembly on metal tables with [channel letter magnets](#). The magnets eliminate the need to create custom templates or take time removing nails post-construction. Durable magnets allow quick and easy repositioning during sign construction. When finished, simply remove the magnets and store for the next use.

The magnets are available in five sizes, with three custom tips perfect for securing tight corners or unique shapes. Channel letter trim cap magnets make the ideal tool for sign makers looking to streamline their process.

Vehicle Wrap Magnets

Compared to the traditional method of using tape, [Vehicle Wrap Magnets](#) make each job faster, easier and more economical. Strong neodymium magnets with 25 lb. pull keep graphics firmly in place without slipping.

The easy-grip patented design allows wrappers to reposition and hold graphics in place quickly and easily throughout the application process, saving time and money.

A polystyrene casing prevents scratching or marring of the graphics and vehicle during installation. Each Vehicle Wrap Magnet, approximate size .75" D x 1" W x 4" L, includes a Magnetic Shield™ to block unwanted magnetism during storage, and a non-scratch felt liner for added protection of delicate surfaces.

Heat Gun/Impact Wrench Holder

The [neodymium tool holder](#) holds heat or paint guns, impact wrenches, water bottles and other heavy tools onto any ferrous metal surface. With 105 lb. of pull, the magnet is sturdy enough to securely hold a wide range of tools.

The vinyl coating on the ring helps keep tools in place, without slipping or scratching. Both the repositionable, non-scratch, rubber-coated base and ring are heat resistant up to 175 degrees Fahrenheit. The tool holder is ideal for vehicle wrap installations, workshops and garages.

About Master Magnetics, Inc.

Founded in 1976, and located in Castle Rock, Colo., Master Magnetics, Inc. manufactures and distributes all types of magnets and magnetic devices for commercial, consumer and industrial use. Backed by over 40 years of industry excellence, The Magnet Source® brand is a registered trademark of Master Magnetics, Inc. and represents exceptional quality, expertise and customer service. For more information, call 1-800-525-3536 or visit magnetsource.com.
