Magnetic Tools Add Ease and Efficiency to Sign Making

Castle Rock, Colo., March 12, 2018 – [Master Magnetics, Inc.](http://MasterMagnetics.com) (The Magnet Source®), a leading manufacturer of magnetic graphics, fastening and sign holding solutions, has focused the simplicity and efficiency of magnets in the design of some essential tools aimed at adding speed and convenience to the sign making industry. Sign makers can find these magnetic tools from Master Magnetics at the [ISA Expo](#) booth 4908.

Channel Letter Trim Cap Magnets

Firmly anchor channel letter trim caps during assembly on metal tables with [channel letter magnets](#). They eliminate the need to create custom templates or take time pulling out nails post-construction.

Durable magnets allow quick and easy repositioning during sign construction. Simply remove the magnets and store for the next use.

Available in five sizes and with three custom tips perfect for securing tight corners or unique shapes. Channel letter trim cap magnets make the ideal tool for sign makers looking to add speed and simplicity to their process.

Vehicle Wrap Magnets

When compared with the traditional method of using tape, [Vehicle Wrap Magnets](#) make each job faster, easier and more economical.

Strong neodymium magnets with 25 lbs. pull keep graphics firmly in place without slipping. The easy-grip patented design allows you to reposition and hold graphics in place quickly and easily throughout the application process, saving time and money.

The polystyrene casing prevents scratching or marring of the graphics or vehicle during installation. Each Vehicle Wrap Magnet, approximate size .75" D x 1" W x 4" L, includes a Magnetic Shield™ to block unwanted magnetism during storage and a non-scratch felt liner for added protection of delicate surfaces.

Heat Gun/Impact Wrench Holder

This strong [neodymium tool holder](#) holds heat/paint guns, impact wrenches, water bottles, and other heavy tools onto any ferrous metal surface. With 105 pounds of pull, this magnet is sturdy enough to securely hold a wide range of tools.

The vinyl coating on the ring helps keep tools in place, without slipping or scratching. Both the

repositionable, non-scratch, rubber-coated base and ring are heat resistant up to 175 degrees Fahrenheit. Ideal for vehicle wrap installations, workshops, and garages.

About Master Magnetics, Inc.

Founded in 1976 and located in Castle Rock, Colorado, Master Magnetics, Inc. manufactures and distributes all types of magnets and magnetic devices for commercial, consumer and industrial use. Backed by over 40 years of industry excellence, The Magnet Source® brand is a trademark of Master Magnetics, Inc. and represents exceptional quality, expertise and customer service. For more information, call 800-525-3536 or visit magnetsource.com.
